NO TRUST MACHINERY.

Our Mowers, Reapers, Binders, Harrows, Corn Binders, Plows, etc., are made outside of the trust.

NON-WARRANTY.—F. H. Ebeling gives no Warranty, express or implied, as to description, quality, productiveness, or any other matter of any seeds, bulbs or plants he sends out, and he will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are at once to be returned.

Nearly Forty Years in Business.

In presenting our ANNUAL SEED BOOK, we feel that a brief reference to our business is timely and of interest to our patrons. For nearly forty years this house has been located in this same block, having been established by Mr. A. D. Perry, the pioneer seedsman. This is the only strictly Seed House in Central New York. Being importers of the choicest flower and garden seeds, bulbs, etc., and dealing as well in the more common sorts of field and garden seeds, Implements, Drain Tile, Hardware, etc, we are better than ever equipped to care for our increasing trade. We wish to thank all who have contributed to our welfare, and greatly appreciate their loyalty and generous patronage.

We supply everything for the **Farm, Garden, Lawn, Greenhouse, Dairy and Poultry Yard**, and again take this opportunity of thanking our many loyal friends and patrons for past favors and generous patronage.

Respectfully yours,

F. H. EBELING, SEEDSMAN.

❧ SPECIAL ANNOUNCEMENT. ❧

AMERICAN STEEL FENCING

For early buyers of this "Famous Fencing," I will make a Special Price to induce liberal purchasing. Have taken in a car load of this fencing and can supply all of the leading sizes at low prices. Those expecting to buy, and will take the fencing during the next sixty days, a special inducement price will be made. "A word to the wise is sufficient."

BOWKERS' CELEBRATED FERTILIZERS.

Those contemplating the use of Fertilizers will find it to their interest to place their orders early. We have sold these fertilizers for many years, and they are equal, or superior to the best on the market. I will give a handsome illustrated calendar of a beautiful New England scene to any one who will make application for same.

INCUBATORS BROODERS POULTRY SUPPLIES

Those keeping fowls, or contemplating of going into the raising of poultry, will find it profitable to consult me, before purchasing their supplies. Can furnish everything from a China Nest Egg to an Incubator. All supplies such as Incubators, Brooders, fixtures and necessary foods, etc., are always kept in stock. We are sole agents for the Cyphers' celebrated Incubators, Brooders and all supplies manufactured by them. See pages 62, 63, 64 and 65 for full particulars.

WAVERLEY OATS

These Oats are new, originating in Scotland and imported by us. Have grown 800 bushels to the acre on ten acres in this county. For full particulars, see page 13.

SPRING GRAIN—Such as Oats, Wheat, Barley, Rye, Speltz, Buckwheat, etc., always kept in stock at right prices.

**SEED
CORN**

We will be prepared to supply our trade with White, Yellow, Smut Nose and Dent Field Corn. Prices will be reasonable this season. We would suggest placing orders early in order to secure the best stock. Can also furnish the different sorts of Sweet Corn which will be rather high on account of the season of last year. The winter having set in early, much Corn was ruined through freezing. This will require careful buying, as there will doubtless be quite a little of this class of Corn offered on the market.

**CABBAGE
SEED**

The large demand and high prices for cabbage will be an incentive to a large acreage being planted this coming season. I desire to call special attention to my stock which I offer at reasonable prices. The Danish Ball Head variety is imported by me direct from the best growers of Cabbage Seed in Denmark, from which source I have had my supply for many years. Beware of the irresponsible dealer who offers low priced Danish Ball Seed. Our other stock of Cabbage Seed is produced by one of the best growers on Long Island. I can offer this seed with all confidence. Prices and samples for testing submitted upon application.

**GARDEN
PEAS.**

A car load of fine Garden Peas has just been received from one of the oldest and best growers in the U. S., with whom we have done business for many years. Prices absolutely right. Place your orders early.

ALSIKE

I would recommend a most liberal use of this excellent Clover. It thrives especially well on moist soils, will not heave out and is cheaper this season than Red Clover. The seed being about one-half the size will go nearly again as far as the ordinary Red Clover. This would make it based upon the price of Red Clover, about \$4 per bushel, which you can readily see is an extremely low price. Horses and cattle are very fond of it, and mixed with hay is considered no detriment to its market value.

HARDWARE

Would call special attention to our Hardware Department. We have a well selected stock suited to our trade at reasonable prices. Also would call your attention to our Tin Shop, connected with our store. Work of all kinds done on short notice.

**FARMING
IMPLEMENTS**

Would call special attention to this department of our business. Can supply everything in this line at reasonable prices. If you need a Corn Binder, Reaper, Mower, Grain Binder, Roller, Harrow, Riding Cultivator, 5 or 7-tooth Cultivator, Potato Planter, Horse-Corn Planter including a Check-Rower attachment, Spraying Tools, Plows, or any of the things necessary to work a farm with, call and see us. Can furnish Catalogue with full particulars. If you wish will send special agent to see you. We represent the leading manufacturers in this line.

PERRY'S MEDIUM BRUNSWICK, SHORT STEM.

Genuine Denmark Grown Cauliflower Seed.

This we have imported annually from the same growers for many years. It will produce a greater number of perfect heads than any other strains of cauliflower.

The leading Cauliflower Growers in this section, have used our strains for years and say it is without equal. A sure header, a fine yielder and a money maker.

A Field of our White Plume and Paris Golden Celery.
Grown by EMANUEL SMITH on Grand Avenue This City.

✓ **Sutton's A 1 CELERY.**

Very dwarf and compact, of superb flavor and deep pink color, but occasionally sporting to white. Although our A 1 is distinctly an early Celery, it remains solid and excellent in quality until quite late in the season. Apart from its superiority for table use, it is indispensable for the exhibition stage before other varieties are ready. Oz. 30 cts. Lb. \$4.00

✓ **Sutton's Solid White Celery.**

Very sweet, large and solid, we recommend this as the best White Celery for the main crop, far superior to the White Plume in flavor, size and solidity. Oz. 30 cts. Lb. \$4.00.

- ✓ **Yellow Seed Butter**—Y. S. Cabbage Butter head, medium large, medium green, leaves crumpled and rather thick. Is similar or same as silver Ball.
- ✓ **Wonderful**—W. S. Curled or crisp, heading, dark green, heads somewhat conical.
- ✓ **Giant White Cos**—Large size, medium light green, is quite tall, forms a good head.
- ✓ **Deacon Head**—Cabbage butter head, medium size, medium green, leaves thick. Does not form a decided head but a well folded one, which is very oily and golden yellow inside.
- ✓ **Denver Market**—W. S. Cabbage butter head, medium small size, medium green. One of the old standard varieties, and in our experience have found it identical with White Seed Tennisball.
- ✓ **Denver Market**—W. S. Curled or Crisp heading, medium size, light green, leaves very curly and crumpled, savoyed and coarsely fringed.
- ✓ **Big Boston**—W. S. Cabbage butter head, medium green, leaves smooth and rather glossy, edges straight. Top of head tinged with brown.
- ✓ **New York**—W. S. Curled or Crisp as Icehead, dark green heads somewhat conical.
- ✓ **Black Seed Tennisball**—Standard sort and used exclusively in the east for hot bed culture but not for green-house culture. Is similar to Salamander which see for description.

Waterloo, N. Y., December 23, 1903.

MR. F. H. EBELING,

SIR-The past season has been one of great extremes in weather conditions which has been severe on a great many growers of Farm and Garden Products. In justice to you as a seller of Seeds which are of such vast importance to the agriculturist, we cheerfully advise you that our success with Seeds purchased of you the past year have proven very satisfactory to us. We are unable to realize why we should transfer our trade to another, while we get such results at your house, which is so well supplied with so much good, at reasonable prices,

Yours respectfully,

DAY & BEARD.

PEAS. Erbsen.

Extra Early Sorts.

Per qt. Per bu.

✓ Gradus or Prosperity, pods big as Telephone, early as Alaska, Scarce	40	\$12 00

✓ Melting Sugar, edible pods	25	5 00
✓ Gray Sugar, edible pods	25	5 00
✓ White Dwarf Marrowfat, 2 feet	15	3 00
✓ Black Eyes, very early and prolific, 3 feet	10	2 50
✓ Canada Field		Market Price

Wrinkled varieties marked thus *

✓ **The Admiral.** Vines vigorous, about four feet high, comparatively slender, little branched. Pods usually borne in pairs and in great abundance; they are about two and one-half inches long, thick, curved, bright green, crowded with six to nine peas of the very best quality and color. We know of no pea which remains palatable longer after it becomes large enough to use. This variety ripens with Telephone or a little later. Owing to its great vigor, productiveness, fine color, quality and suitable size of the green peas, it is admirably adapted for canners' use

SPINACH, Spinat. 25 to 100 lb. lots, special prices.

NEW ZEALAND SPINACH.—Yields an abundance of the tenderest Spinach during the hottest months of the year, or in dry, arid localities where the ordinary Spinach runs to seed. The seed is sown where the plants are to stand, in May or earlier in a hot-bed and transplanted, and the plants will continue to yield a supply of good leaves of excellent quality during the entire summer, requiring scarcely any attention. Genuine imported seed only. Pkt. 5c., oz. 10c., 1/4 lb. 30c., lb. \$1.00.

✓ Early Giant Thick Leaved. An early maturing sort, with large leaves of fine, deep color	oz. 5c; lb.	25c
✓ Round Summer Broad Leaved preferred in the north for early spring sowing, and is the most popular with our market gardeners. The leaves are large, thick and fleshy, Though not quite as hardy as the Prickly Winter, it stands exposure very well	oz. 5c; lb.	25c
✓ Round-Viroflay, (Thick-leaved) has very large, thick, dark green leaves; the favorite market gardener's sort for fall or spring sowing	oz. 5c; lb.	25c
✓ Curled Leaved Savoy, or Bloomsdale. Large curled and wrinkled leaves; tender and of the finest flavor	oz. 5c; lb.	25c
✓ Long-standing, (Round Thick-leaved). Dark green; leaves large and thick; very long-standing before running to seed; the best for spring growing	oz. 5c; lb.	25c
✓ Victoria (new). Extra dark black-green color; two or three weeks later than the ordinary "Long-standing;" a fine variety for spring sowing	oz 5c; lb.	25c
✓ Prickly or Winter. Vigorous and hardy, and recommended for fall sowing	oz. 5c; lb.	25c

Bei uns wird Deutsch gesprochen.

NEW THINGS FOR 1904.

NEW CUCUMBER, "THE CUMBERLAND."

This handsome cucumber is the result of eight years' careful breeding by one of the leading growers in the United States.

It is a cross of Parisian Pickle and Peerless White Spine. The vines are of strong, vigorous growth and very productive. The fruits, which are of handsome appearance, grow to a desirable size, very straight, firm, solid and crisp. Color is a rich pea-green, and flavor very fine, either when eaten sliced in the raw state, or after they have been pickled. Pkt. 10c; oz. 30c.

ONONDAGA MUSK MELON.

This new early, large, fine oblong, netted, green fleshed Melon was originated in this city and has become a great favorite with the dealers, and much sought for as a table melon. A great yielder, very hardy, firm fleshed, attractive in appearance a ready seller—one of the best introductions of recent years. Price, ounce 25 cents; pound \$1.50.

NEW DWARF CHAMPION PEA.

In offering this new pea, we are filling a long wanted demand.

A pea with all the merits of the well-known and reliable Champion of England, being hardy and excellent quality, but less vine, larger pods and more of them.

In this pea we have a hardy robust and vigorous grower, productive of handsome dark green pods of good size and in great abundance, and the quality is unsurpassed.

Height of vine about 26 inches.

Season, coming in after the Little Gem.

For a reliable staple market variety we believe it fills a long felt want. Price, per qt. 40 cents; per bushel \$8.00.

NEW SURPRISE PEA.

This remarkable new sort is a cross of Earliest of All and American Wonder, possessing the quality of the American Wonder and is as early as the Earliest of the Hard Peas. The vines grow 24 inches high and need no bushing, the pods are well filled, containing 6 or 7 peas. The peas are not as large as those of the American Wonder but SURPRISE is a far better cropper and ready for market some days earlier. It was tested in the grounds of the "Rural New Yorker," and E. S. Carman wrote of it. "It is the earliest Pea we have ever tried." The editor of the "New England Farmer" writes. "Of 33 varieties on trial it was the first to pick and the first to dry down." SURPRISE has the hardiness of Earliest of All, it is a far better pea and cannot be recommended to highly. Another very important feature of SURPRISE pea is the fact that it is ordinarily not subject to mildew, and can therefore be planted again in August for a late crop. A point which market gardeners and private planters will appreciate. Price, 30cts. per quart; \$7.60 per bushel.

THE DELICIOUS SQUASH.

The Delicious is the product of years in careful selection, crossing and isolating. About every known variety enters into its composition. The result is a squash that by universal agreement surpasses the Hubbard and Marblehead. Its color is almost uniformly of a green shade. In thickness of flesh it surpasses nearly every variety the color being a dark orange. It is a fall and winter squash, excellent at all seasons, like the old Hubbard, though at any time excellent, does not acquire its best quality until winter. When half grown it will be found to surpass in quality most varieties when fully ripe. Price per packet 15c.

FAMOUS
WAVERLEY
WHITE OATS.

**IMPORTED FROM SCOTLAND.
GIVES ASTONISHING RETURNS.**

We believe more new varieties of Oats have been placed before the public than any other kind of seed grain. Many *heavy croppers* have been introduced of late, but on first trial they are rejected on account of thick coarse hulls or poor weak straw, if for nothing else. When, therefore, we state that in addition to the **Waverley yielding immense crops**, it is also **thin in the hull** and has a clear **bright amber colored straw**, which **stands upright** in almost all kinds of weather, we are sure we have said enough to inlist the attention of farmers everywhere. Our crops have satisfied us that it is wonderfully adapted to both the soil and climate of this country. Waverley is ready to harvest about the same time as other sorts and is the **Heaviest Weight Oat** we have ever seen, while the hull is quite fine and light. The kernels are so unusually **sweet, large and meaty** as to appear like mammoth Rye grains. The most **distinctive feature** of the **NEW WAVERLEY** is its producing **three grains in a spikelet**, whereas most all other varieties produce but two. Of immense stooling qualities. **WAVERLEY** gives great promise of becoming the leading Oat for this State and we predict an enormous sale as soon as its merits become known.

On the farm of Col. A. C. Chase at South Onondaga, N. Y., over 800 bushels were grown on 10 acres. This is a remarkable yield considering the season.

PRICE \$1.25 per Bushel, special price for large lots.

New Waverley Oats.

We offer choice well cleaned, true to name, varieties of following SEEDS at reasonable prices.—

- BUCKWHEAT—\$1.00 per bushel.
- SPRING RYE—\$1.40 per bushel.
- SPRING WHEAT—\$1.25 per bushel.
- COW PEAS—\$2.75 per bushel.
- DWARF ESSEX RAPE—\$6.50 per 100 lbs.
- FIELD CORN—White or Yellow, Market price.
- HURON DENT CORN.—\$1.25 per bushel
- GOLDEN MILLET—\$1.75 per bushel.
- KAFFIR CORN—\$1.25 per bushel.
- WHITE SEED OATS—We offer choice well cleaned, true to name, varieties of Seed Oats at reasonable prices.
- SPELTZ—\$1.00 per bushel.
- SOY BEANS—\$1.75 per bushel.
- JAPANESE MILLET—\$1.50 per bushel.
- AMBER CANE.

BEARDLESS BARLEY—A fine yielder. Strong growth of Straw. A barley without the objectionable beards, giving it a superior feeding value. These features combine to make it the best and most profitable Barley known. Beardless Barley was introduced by us several years ago, and has proved to be very popular. Price \$1.00.

HURON DENT CORN. Ripens as early as common field corn. Size of ear between the leaming or the ordinary eight-row sort. Ripens as early and is the best of the Dent varieties, Something that is bound to take the place of the common field sorts with the advantage of its being a much larger yielder. We have a fine stock. Price \$1.25 per bushel.

Alfalfa or Lucerne Clover.

Alfalfa produces 5 to 8 bushels of seed per acre. American grown seeds should always be used.

ALISKE.

This hybrid clover does well on strong clay soil, and thrives equally on upland or lowland. It is the proper companion for timothy, the stout stems of the latter sustaining the slender Alsike and the mixture making the best of hay, ranking as No. 1 timothy in market. Alsike has high value, also, as a renovator of marshy land, as it drives out the sedges and other wild growths. It has no tap root but a mass of fine laterals, hence it does not winter kill by heaving. As both hay and pasture, it is greatly relished by all stock. The seed is a profitable crop, and the haulm left after threshing has considerable feeding value.

FALL SEEDING.

At this season the ground is warmer than the atmosphere; the gradual reduction of temperature checks leaf growth, while the warmer soil invites a vigorous root formation which continues until the ground is frozen, and is resumed at every thaw.

Grass revels in cool moist soil, and its roots make ready through winter for the summer growth above ground. In spring the soil, especially if it has been long under tillage, dries all too quickly, being poor in humus, and the air being warmer than the ground stimulates top growth of new seeding before the root formation is able to sustain it, the young grass, therefore, has a struggle for life.

If grain has been sown with grass its more vigorous seeding robs the grass plant of moisture to such an extent that it is often killed outright, and the farmer bewails the "uncertain season" that caused him to lose his seeding. This failure to secure a stand is the most persistent and costly feature in grass culture of late years in the middle and eastern states.

COW PEAS,

The principal varieties grown in the northern states are the black and whippoorwill, a brown striped pea.

Sow after the season for corn planting when the ground is thoroughly warmed. Most of the failures with this crop have resulted from sowing too early, the seed either rotting or the plants making but a feeble start from which they never fully recover and often being choked out by weeds.

The ground should be free from weeds and to make it so, should be harrowed two or three times at intervals of five to seven days before Peas are planted.

Sow 1 to 1½ bushels per acre, if broadcast, and if drilled, 20 to 30 lbs. Cover ½ to 2 inches deep.

Drilling 30 inches apart and cultivating between the rows is the best method of culture. When the plants begin to run they should be allowed to cover the ground.

May be sown with oats for forage, one-third oats, two-thirds peas broadcast.

As far north as Michigan, Cow Peas have made a vine growth of 8 feet and root growth of 5 to 6 feet, and have matured over 30 bushels of seed per acre.

Sown after early potatoes are dug, the Peas will make feed in 8 weeks. Will keep down the weeds and leave the land in splendid condition for any succeeding crop.

This plant makes one of the best quick growing cover crops to plow under for enriching the soil.

**KAFFIR
CORN.**

Is the only non-saccharine Sorghum adapted to northern growth. It is not equal to the saccharine varieties for forage but produces a heavier crop of seed which is valuable as food for poultry and cattle. It thrives in regions of the western states which are too arid for the certain production of other grains. Culture same as for saccharine varieties. \$1.25 per bushel.

**SOJA OR
SOY BEAN-**

This bean as yet so little known in the eastern states is of great value as a forage plant, a soil renovator and food producer. It will grow wherever white beans flourish and will yield within 90 days from planting 8 to 12 tons of green forage more nutritious than clover. Will store in the soil a considerable amount of nitrogen and if allowed to mature will produce from 30 to 60 bushels of beans, richer in protein and having a higher feeding value than any other food grown, for cattle, sheep or swine. The beans should be ground before feeding. Seed should be planted after the ground is thoroughly warm. Drill 28 to 30 inches between rows. 10 to 15 quarts per acre, leaving plants 4 to 6 inches apart in the rows. There is a large and increasing demand for northern grown seed at good prices. Why not have some?

SORGHUM.

Early Amber is the earliest and hardest Saccharine Sorghum and should be sown after the season for corn planting when the ground has become thoroughly warmed. It will thrive on any soil that will produce corn. Prepare the ground as for corn and before sowing the seed, harrow two or three times at intervals of 5 to 7 days to kill weeds. If to be cut for forage, drill the seeds in rows $2\frac{1}{2}$ to 3 feet apart, cover $1\frac{1}{2}$ to 2 inches deep, roll the ground after planting and harrow lightly to conserve moisture. Cultivate as you would corn. If for hay or Pasture sow broadcast 1 to $1\frac{1}{2}$ bushel of seed per acre or drill 10 to 20 pounds with a grain drill.

**DWARF
ESSEX
RAPE.**

The true Dwarf Essex Rape is valuable as a fattening food for pasturing sheep in autumn. It is particularly adapted as a "catch crop" for it grows best late in autumn. In the northern states it can be sown at any time from May until the end of August, but in southern states it should not be sown until September or October for winter pasture. Its fattening properties are said to be twice as good as clover. Sow ten or twelve pounds per acre in drills fifteen inches apart. When sheep are feeding on Rape they should at all times have access to salt. Per pound 8 cents; 100 pounds \$6.50.

MUSHROOM SPAWN.

CAMPIGNON, FRENCH. Culture—Mushrooms may be grown in cellars, under benches of greenhouses or in sheds, wherever the temperature of 50 degrees can be kept up throughout the winter. The beds should be made from November to February, according to the time the mushrooms are wanted, and it requires about two months for them to begin bearing. Secure fresh horse dung, free from straw and litter, and mix with it an equal bulk of loam from an old pasture. Keep this under cover, taking care to turn it every day to prevent heating, until the pile is large enough to make a bed of the required size. Three or four feet wide, eight inches deep, and any length desired, are the proper proportions for a bed; but these may be varied. Prepare the mixture of loam and manure making the bed in layers and pounding down each with the back of a spade. Leave this to heat through for a few days and as soon as the heat subsides to 90 degrees, make holes in the bed about a foot apart each way, into which put pieces of the spawn two or three inches in diameter; fill up the holes with the compost, and at the expiration of a week or ten days the spawn will have thoroughly diffused itself through the bed. Spread a layer of fresh soil over the heap to the depth of two inches, and cover with three or four inches of hay, straw or litter. Examine the bed often to see that it does not get dry. Take special care, however, when water is given, that it be at a temperature of about 100 degrees. Price 25c, per lb.

**MUSHROOM BED.**

If in doubt what to grow on your land sow clover seed. You can't have too much of it and feed it out on the farm.

Kill the weeds by two or three harrowings before sowing grass seeds or grain.

The man who makes two weeds grow where but one grew before by sowing the seed on his well prepared soil is a fool. *By Clean Seed.*

Weed seed is a dear purchase at any price. The home supply is more than enough.

**TRUE TYPE
COMMON MILLET.**

Note the contrast between this and the Southern Golden Millet.

The True Tennessee Golden is the only Millet worth sowing—it yields immensely and grows quickly into a big fodder. Will grow six feet high. We have a fine stock of the True Golden Millet, which is worth ten times as much as the “Common.”

Golden Millet, \$1.75 per bu
Common Millet. 1.00 “ “

Also offer fine stock Hungarian Millet.

O’Hara Bros. of Camillus, grew a crop six feet high. Ask them.

SUPPLEMENT TO FLOWER SEED LIST.

Flowers of Easy Cultivation that all Lovers of Flowers can and Ought to Grow.

ASTERS

For early flowering sow inside in April or March, in shallow pans or boxes, using a light soil. Cover seed very lightly; transplant seedlings when large enough to handle; plant in permanent beds about June 1st; for late flowering sow in open ground as soon as weather permits.

Our Asters are Grown for Us by Specialists from the Finest Strains in the World and are Unrivalled.

AMERICAN BRANCHING (Semple' or Vick's Branching.) A free growing Aster of robust, erect habit producing large, feathery blossoms, resembling Japanese Chrysanthemums; one of the finest for cutting. Height three feet.

For all other varieties see General Flower List,

BALSAM

Beautiful and easily grown Half Hardy Annuals. Sow in open ground in May; the soil should be light and open; height 1 to 2 feet

DOUBLE WHITEoz.	\$2.00,	pkt. 10c	DOUBLE ROSEoz	\$1.50	pkt. 10c
" PINK"	1.50,	pkt 10c	" RED"	1.50	pkt. 10c

CALENDULA (MARIGOLD.)

Hardy free flowering Annuals with large double flowers in splendid variety of colors; grows well in dry situation; height, 1 foot. Sow outside in May.

MIXED, all colors	oz. 50cts.	Pkt. 5cts
--------------------------------	------------	-----------

CALLIOPSIS OR COREOPSIS ANNUAL VARIETIES.

Charming hardy Annuals, blooming early and lasting in flower till frost. Very useful for cutting.

MIXED VARIETIES in Rich and Brilliant Colors	Pkt 10cts
---	-----------

CANDYTUFT (IBERIS.)

Very showy, hardy Annuals, growing about 1 foot in height; grows well in any ordinary soil. Sow outside in May.

MIXED COLORS in great variety	oz. 30cts.	Pkt. 5cts
--	------------	-----------

CARNATION MARGUERITE.

Half hardy perennials if sown inside in spring and transplanted to the open garden in May, will flower in July and continue till frost, when with a light covering of rough straw or leaves they can be carried over winter and be much better the following year; or they may be potted up in the fall and flowered in the house during winter. The flowers in size, fragrance and variety of colors are equal to the best greenhouse varieties. Sow inside in March or April in shallow pans or boxes; transplant in open ground in May, or sow seed outside as soon as danger of frost is over.

MIXED VARIETIES, or separate colors (white, pink, red, rose yellow, striped.)	oz. \$2.00,	Pkt. 10 cts
--	-------------	-------------

CASTOR BEAN (RICINUS)

Tender Annuals of rapid and gigantic growth, producing enormous dark green or bronze colored palmate leaves, excellent for massive foliage effect on lawns or backgrounds; can be started in April in the house and transplanted to the open garden about the first of June where they will attain a height of from 6 to 10 feet in a few weeks. 25c oz., 5c pkt.

CHRYSANTHEMUMS' ANNUAL VARIETIES.

Hardy Annuals of easy cultivation and blooming early in the summer; grows about 2 feet high; splendid variety of colors.

SUPPLEMENT TO FLOWER SEED LIST.

COSMOS EARLY FLOWERING.

One of the most beautiful flowers in cultivation; if sown in May in the open ground will bloom about the middle of July; the colors include pure white shades of lilac, rose and crimson.
MIXED SHADES Pkt. 10cts

DAHLIA, SINGLE.

These popular flowers can be raised from seed and flowered the same season, and nothing gives more satisfaction than a good bed of single Dahlias, being far superior to the double varieties for cutting purposes; sow seed inside in April; plant in the open ground about the first of June. A cool, rich soil suits Dahlias.
MIXED VARIETIES Pkt. 10cts.

MIGNONETTE.

This delightfully fragrant plant should be grown by every one who has room for a window box. Its cultivation is the easiest possible. The seeds should be sown early outside, and the young plants thinned sufficiently to allow them to branch. Water freely in dry weather.
MACHET, one of the best oz., 60cts. Pkt., 10cts

NASTURTIUMS.

No collection of flowers should be without Nasturtiums, they grow so forcibly and afford such a variety of rich bright colors. As a cut flower there is nothing more effective, sweet scented and pleasing in every way.
TALL VARIETIES MIXED . . oz. 10 ts. Pkt. 5cts | **DWARF VARIETIES MIXED**—oz 15c Pkt 5c

OUR MIXTURE OF NASTURTIUMS IS THE FINEST IN THE COUNTRY.

NAME.	Hardness and Duration.	Height. Feet.	Color of Flower.	Culture.	Per Pkt.	GENERAL OBSERVATIONS.
Aster, Truffaut's La Superbe.....	hA	2	pure wht.	D	10	Aster. No lover of these flowers can find anything so easily cultivated that would afford such genuine pleasure and satisfaction. The New Washington varieties are extremely beautiful, attaining a very large size averaging 4½ inches in diameter, and in delicacy of tints are unequalled. Aster seed should be sown early in the Spring in a hot-bed or window box and transplanted out-doors when the weather is warm, about 12 inches apart—the taller varieties a little farther apart and the dwarf varieties a little nearer together.

Daimond Edge

Tree Pruner.

PATENTED.

The above Pruner is the most powerful Tree Pruner on the market. The strength and power of this tool is wonderful, and the secret of it is that the nut remains where it is turned, for this reason the blades work inside the LINK NUT TIE, thus there is no friction on the head, or nut of the bolt, and the blade always cuts tight to the edge of curved blade and never becomes loose, as on other similar tools.

MASTICA FOR GLAZING.

Greenhouses, Sashes, etc., new and old. It is elastic, adhesive and easily applied. It is not affected by dampness, heat or cold.

Every florist has experienced difficulty in obtaining putty [whether ordinary or white lead] for glazing, that is satisfactory for any length of time. The fact is putty is not adapted for greenhouse work. "Mastica," when applied, in a few hours forms a skin or film on the entire mass, hermetically sealing the substance, and preventing the evaporation of the liquids, and remains in a soft, pliable and elastic condition for years. "Mastica" is of great value in going over old houses with a putty bulb or machine on the outside of sash, as it makes it perfectly tight and saves the expense of re-laying the glass.

The use of "Mastica" avoids the necessity of repeatedly reglazing the houses, saving much time and expense. With "Mastica" you can bed in or use outside with machine.

Broken glass can be easily removed and replaced by new without the breakage of other glass, which usually occurs with hard putty. One gallon will cover about 290 running feet [one side].

Prices of Mastica, soft for machine application, $\frac{1}{2}$ gal., 65c., gal., \$1.15. We are Sole Agents for Central New York.

LAWN SEEDS.

The best Lawns of Syracuse show what we are doing to promote this good work in our midst. For years we have studied the nature of grasses, their adaptation to soils, height, color, etc., with this object in view. We use in our mixture only grasses that harmonize in color and size, using both early and late varieties, that our lawns may remain green and beautiful all through the season. We are sure there is no better mixture for lawns than ours. Our *Lawn Seed is Strictly Pure*. We examine every variety under a glass before we mix them, that our lawn seed may be free from foul weeds. We use only fibrous rooted perennial grasses that will stand the drouth and close cutting without injury. We select grasses that harmonize in size and color in order to produce a fine velvety appearance and form a thick covering on the ground.

THE IRON AGE

FARM AND GARDEN IMPLEMENTS.

The "Iron Age" Catalogue for 1904
Will be sent Free upon Application.

NO. 6. Iron Age Combination Double Wheel Hoe, Hill and Drill Seeder. Price \$11.00

NO. 7. Iron Age As a Seeder Only.
Price - - - \$8.00

This tool is without question the most practical and complete combined garden implement ever offered the public, the ease and simplicity of adjustment, the lightness combined with great strength, the accuracy by which it drills or hills the seed, and the small amount of power required to operate it, are the most important features.

The wheel is made of steel, 16 inches high; the frame of pipe, coupled to malleable castings. In each form, whether a Seed Drill, a Double Wheel Hoe or a Single Wheel Hoe, it is equal to any tool or tools made especially for one purpose.

It places the seed in hills or drills, it plows, it rakes, it opens furrows, it covers, it hills, it hoes, it cultivates.

NO. 1. Iron Age Double Wheel Hoe. Price, \$6 50

(The Drill Form of the Tool Shown Above.)

NO. 3. Iron Age (Side Hoes Only) Price \$3 75

At a glance one can see the great usefulness of this tool. The garden or farm is incomplete without at least one of them.

In cultivating onions, beets, turnips, radishes, etc., it is invaluable, saves hours of hard labor and does the work better than several men could do it in the same time. One great advantage which this Double Wheel Hoe possesses is that it can be made into a practical Single Wheel Hoe in a moments time.

An axle is sent with every Double Hoe for this purpose. The wheels are 16 inches high, enabling the Wheel Hoe to run easy and without yielding to the inequalities of the soil, as a low wheel will do. The frame being made of tubing coupled to malleable castings gives great strength, together with lightness. All the tools shown in the cut go with the machine for the price, \$6.50

Showing the Double Wheel Hoe Set Up as a Single Wheel.

A Seed Drill attachment for sowing in rows only (No. 4) or for sowing both in rows and hills (No. 6.) \$3.50 and \$4.50 respectively.

When applied the tool is identical with that of the Iron Age No. 4 or 6. Combined tools, depending upon which seed attachment is applied.

The Weeder Attachment, Price per. pair \$1.00

No. 15 Iron Age Combined Single Wheel Hoe, Hill and Drill Seeder. Price \$10

No. 16 (as a Seeder Only) \$7.50

In combining these tools not a single advantage of a separate Single Wheel, Hoe or Seed Drill is lost. As each they are in themselves complete. Changed from one form to another almost instantly, completely filling every desire both as to method of handling seed and soil.

It places the seed in hills or drills, it plows, it rakes, it opens furrows, it covers, it hills, it hoes, it cultivates.

The wheel is made of steel 16 in. high; the frame of pipe, coupled to malleable castings; therefore light, (runs easy) strong and durable.

- No. 20, Iron Age, the wheel hoe form of No. 15.....\$5.50
- No. 21, With Side Hoe, only.....\$3.50

No. 12 IRON AGE WHEEL PLOW AND CULTIVATOR, Price - - \$3 25

No. 11 (Same with Plow Only) \$2.25

In the accompanying cut we show a tool of exceeding lightness but of great strength, which is designed to do a greater variety of work than any other tool of the same price. It will accomplish all the work necessary in a small garden,—plowing, furrowing, covering, hoeing raking and cultivating. This tool is emphatically a friend of the laborer or mechanic who can afford only a small amount of money in a garden tool, and whose few moments in a garden must be devoted to "straight-ahead" work.

THE NEW MODEL SEED DRILL, Price - \$7.50

The New Model Seed Drill contains all the good points of every old drill in the market, with this point in addition, the slide or hole through the slide where all the seeds have to pass, is adjustable, and the slide can be changed to a fraction by the operator, thus admitting exactly the quantity of seed required. The hole is diamond shaped, which is another advantage for rough or irregular shaped seed. CUT-OFF—The flow of seed can be instantly stopped by a swinging cut-off, conveniently operated by a cord and ring on handle. This cut-off prevents all loss of seed at an end of rows, and its swinging or gravity form will be found far preferable to one that slides under, as it cannot injure the falling seeds.

No. 22. "Iron Age" Combined Fertilizer Distributor, Hill and Drill Seeder, Price \$17.00

In these days of strong competition in the growing of crops, it becomes necessary for the market gardener to make a study of the most economical use of fertilizers, and to obtain this economy requires such a tool as in accompanying cut, which applies the fertilizer in connection with the seed, just where it will do its greatest good; or by the use of the same tool in its other form, as shown below by applying quick acting fertilizers to growing plants.

Although a tool designed to do so much, it is perfectly simple, light of draught, strong and perfect in quality of the work done by it. These plows are adjustable in depth and width, which allows the adjustment at the depth at which the fertilizer is sown and allows its distribution in narrow streams at different distances. The plows are immediately followed by the covers which draws the soil over the fertilizer just deposited.

The Fertilizer Distributor is thoroughly reliable in its distribution of fertilizer. It contains a force feed device which prevents stoppage by small lumps.

The Seed Sower Device is practically the same as used on Nos. 6 and 15 Combined Seed Drills. The seed may be sown in rows or dropped in hills at 4, 6, 8, 12 or 24 inches apart. For soft ground we can furnish a wide tire attachment.

No. 23. "Iron Age" Fertilizer Distributor (As a Side Dresser.) Price \$12.50.

Hill and Drill Seeder Attachment, \$4.50.

The side or top dressing of growing plants has become a practice of great importance. It is not merely a matter of the economical distribution of high priced fertilizers, but what is of more consequence, the placing of it just where the rootlets will quickly seize and absorb its chemical constituents.

With the addition of the Hill and Drill Seeder attachment, this tool is identical with the No. 22 Combined Fertilizer Distributor Hill and Drill Seeder shown above.

This tool is operated by working astride the rows of growing plants, and the result accomplished will be most gratifying.

Gem Single Wheel Hoe, \$4.50.

The popular GEM has been so largely used by gardeners that it needs no introduction. It is made mostly of steel and malleable iron, and is light in weight.

No. 60 "IRON AGE" PIVOT WHEEL RIDING CULTIVATOR.

PRICE, \$35.00.

Add for Plows 75c. Fallow Tools \$1.15

Ball Bearings—It has wonderful ease of guidance, the pivots being vertical near the wheels, and the ends resting upon hardened steel balls.

Spring Pressure Lock-Down—To prevent the gangs from rising and slipping over hard places, we furnish this Cultivator with a spring pressure lock-down, strong enough to hold it to its work in stiff ground, but weak enough to allow the gangs to rise before damage could occur to them or the standards.

The Lever Gang Adjuster gives the operator immediate control of the width of his gangs. With this adjuster the gangs are always at equal distance from the center. One important feature of our Adjuster is that the gangs, and necessarily the teeth, are always kept parallel with each other, each tooth presenting its face squarely to the front at all times, and therefore will not throw soil toward the row when expanded, and from the row narrowed up, as is the case when the gangs are pivoted at the front. Especially is this Adjuster valuable where the distance must be changed frequently.

The **Gangs** are of such design as to give great strength—very rigid, so as to instantly follow the directions given by the wheels. For cultivating potatoes and all close grown crops the outside part of gang is removed, together with the standard and tooth.

The **Standards** are made of good steel and can be instantly adjusted in depth of angle of cut, or removed altogether by simply loosening one nut.

Points—The steel points sent out on the Cultivator are 2½ inches in width and 10 inches long, while we have, also, of the same length, points 1¼ and 3½ inches in width, meeting a call for those extremes.

The **Wheels** as shown in cut, have flanged tires to prevent slipping on hill sides. They are made of steel and while they may appear light, yet they are very strong and durable.

No. 70 "Iron Age" Combined Pivot and Fixed Wheel Riding Cultivator. Price, \$36.00

Although a combined tool when used in either form, a Pivot or Fixed Wheel Cultivator it is a thorough success, containing advantages over many tools made expressly as a Fixed or Pivot Wheel tool. The wheels are made of steel, 30 inches high with a broad face tire, 2½ inches wide. They are adjustable in width at any point between 42 inches at the widest and 32 inches at the narrowest. This adjustment allows for the entire cultivation of rows 54 inches apart, and as close as 28 inches or even narrower.

PIVOTED GANG BARS—The gang bars are hinged or pivoted and the cultivating width can be quickly changed by the simple loosening and tightening of two bolts. They are of round bars of steel, with a groove that engages a rib on the tooth holder, thus preventing all danger of turning on the bar, while the eye-bolt firmly clamps the tooth holder to the bar, with no danger of sliding. This combination also gives the facility of changing the position of the teeth on the bar or of increasing or reducing the number.

We call attention to our method of connecting the gangs in front—a connection of parallel links, giving an easy, swinging motion to the gangs, at the same time keeping them square to the front, instead of constantly changing the face of the teeth as occurs by the use of the ordinary single coupling. A **SPRING TOOTH ATTACHMENT** may be quickly and easily applied.

Price per set of 8 (including points)
\$7.00

The Improved Robbins Potato Planter.

PRICE.

With Fertilizer Distributor	\$75.00
Without " "	65.00
Pea and Corn Sower Attachment	5.00
Leveler Attachment95

A machine that is completely and thoroughly successful. Has none of the faults of other planters and does better work than planting by hand.

The opening plow is a double mold plow which throws out on each side a free furrow of loose soil with no packing or wedging to crowd the future growth of the crop.

The fertilizer distributor sows the fertilizer in a broad stream 6 to 8 inches wide, in any quantity desired and same is mixed thoroughly with the soil by the shoe preceding the potato tube.

The seed is dropped at 12, 14, 15½, 17, 18½ or 20 inches apart. The change from one distance to another can easily be made by changing sprocket wheels. The covering is accomplished by means of a pair of discs which cover the seed with a full free covering.

The seed is neither punctured nor injured in any manner while being deposited in the furrow below, so one may rest assured the seed, after it is planted, is in as good condition as when first placed in the machine.

We refer you to these gentlemen who are using them : C. C. Wilcox, Oswego Falls, N. Y. ; D. R. Overacre, Salina ; Frank Horley, South Beach st. ; T. A. Mitchell, Weedsport, N. Y. ; Mr. Pendergast, Phoenix, N. Y. ; Hubbs Bros., No. Manlius ; Oliver Ormsby, Fairmount, N. Y.

No. 1 Iron Age Combined Harrow and Cultivator.

Price	\$5.25
Without Wheel or Lever	4.00

An excellent tool for the cultivation of all small crops. Thoroughly pulverizes the soil without throwing but little dirt.

All believing in level culture should own one of these harrows.

No. 6 "IRON AGE" HORSE HOE AND CULTIVATOR.

PRICE, - \$5 to \$7.50

It is truly a Twentieth Century Tool. Its great adjustability adapts it for numberless uses and conditions. In each form it is simple, strong and effective.

WHEELBARROW SEEDERS.

WITH RUBBER, WIRE OR TWINE DISTRIBUTORS
WITH WOODEN OR IRON FRAME.

THEY CAN BE WORKED BY ANYONE WHO CAN RUN A WHEELBARROW.

PRICE, \$6.50 TO \$8.00 EACH.

THE LITTLE GIANT SEED SOWER.

This is the cheapest Crank Seeder on the market, and equal to the best for quality of work it does and durability. Don't pay \$5.00 for a seeder when you can get its equal for less money.

Will sow Wheat, Rye, Oats, Rice, Flax, Millet, Turnip Seed, Clover Seed, Grass Seed, including Light Grasses; in fact any kind of Seed broadcast. Also Plaster, Fertilizer, Salt, Ashes, etc.

They save one-third seed and two-thirds labor.

CRANK SEEDERS,	- - - -	\$2.00
FIDDLE SEEDERS,	- - - -	1.50

You've Wanted it a Thousand Times

Eureka Kitchen Garden and Hot Bed Seed Drill

It will sow and cover Beets, Cabbage, Carrots, Celery, Lettuce, Onions, Radishes, Spinach, Turnips, and all such seeds with the greatest regularity. Force Feed. It is only intended for very small operations.

Have You a Kitchen Garden ?

Don't try to do without this little planter another season. Your garden will smile approbation all through the season if you use the EUREKA.

Have You a Hot Bed ?

This drill you must have. It is the only machine suited to sow in a hot bed. Sows up close to the sides in straight rows. Sows the smallest packet of seeds as well as a larger bulk. This Drill is not a toy, but a strong, practicable machine that will last many years. Don't buy a similar machine that has the opening plow in front of the machine. You cannot get near the sides of a hot bed nor close up to the fence. Neither does it cover seed. It will be an aggravation rather than a labor-saving machine, as we offer.

PHILADELPHIA, PA., Dec, 1902.

J. A. AVERITT,

Dear Sir—We received the "Eureka" Garden Seeder and sure that it is the only thing of its kind on the market to give satisfaction.

Yours very truly,
[Signed] HENRY A. DREER,

PRICE ONLY \$1.00.

DISCOUNT TO THE TRADE.

We have sold SLUG SHOT for a great many years, and it is as popular and effective as ever.

SLUG SHOT—Is a light, composite, impalpably fine powder, easily distributed by Duster, Belows, or in water by spraying. It is thoroughly reliable in-killing Currant Worms, Potato Bugs, Cabbage Worms, Lice, Slugs, Sow Bugs, etc., and is also strongly impregnated with fungicides.

SULPHO-TOBACCO SOAP—Quickly exterminates all insect life on plants and flowers in and out of doors. Unsurpassed for rose bushes. For a cheap, effective, clean and harmless Insecticide, for Amateur and Professional Growers, this is unexcelled. It also acts as a valuable fertilizer reviving plant life. For domestic purposes it rids the house of cockroaches, and is a superior wash for dogs and all animals. Prevents poultry lice. You cannot afford to be without this popular and well known Insecticide, if you desire to be successful in plant culture. A trial will give highly gratifying results.

3-oz. Cake sufficient for 1½ gallons prepared solution, 10c; mailed postpaid 13c.
8-oz. Cake, sufficient for four gallons prepared solution, 20c; mailed postpaid 28c.

DISPARINE.

G. G. Hitchings of So. Onondaga, says: I consider DISPARINE superior to Paris Green for spraying fruit trees. It adheres longer to the foliage and remains in suspension longer than Paris Green. It does not injure the foliage. Consequently the trees require less spraying as the rains do not wash it off so readily. I consider it one of the best sprayers known at this time. I shall use it entirely another season.

THE HIGH PRESSURE SPRAYER.

For Potato Bugs.

Knapsack Sprayers. Each cylinder will hold two gallons. This will be the fastest seller yet offered **Price \$2.50** for spraying purposes.

DIRECTIONS.—Fill one cylinder full of what is required. Close the faucet and filler hole tight. Work the pump $\frac{1}{4}$ to $\frac{1}{2}$ minute then turn the faucet and direct the spray where wanted.

This gives you 15 minutes' continuous work with a very fine or coarse spray, narrow or wide spread, as you wish; all controlled by turning the faucet.

Rapid Work in a Potato Field.

Two Row Deere Corn-Planter.

This plants two rows at a time and is the latest addition to the justly celebrated line of Deere Planters. It is so simple that it is next to impossible for it to get "out of fix," and in the matter of convenience is simply in a class by itself.

The drop works on the "edge selection" principle, taking advantage of the fact that kernels of corn, while varying greatly in size, are comparatively uniform in thickness. This gives the Planter an extremely accurate drop.

The valve mechanism is entirely enclosed within the bank, and is not affected by corn-stalks or other trash. The corn is forced out of the heel in perfect check, regardless of the speed of the team, and there is no clogging of the heel.

It is always ready for either hilling or drilling, no change of the valves being necessary and no change of plates for the distances most used. The foot-drop is always ready for use and is convenient to the foot.

While the front and back frames are extremely rigid, there is a spring connection between the two, allowing the Planter to follow the inequalities of the surface of the ground.

The automatic reel is simple and effective, and so situated that it need never be removed from the Planter, although it may be taken off by simply removing one spring cotter.

An adjustable seat adds greatly to the comfort of the operator.

Price for Corn Planter, Check Rower
and Drill \$45.00
With Fertilizer attached \$55.00

Refer to Skiff Bros., of Salina; Henry Lacy of the Third National Bank, Alden; and Frank Matty and Averill & Gregory who are using them.

WIARD STEEL AND IRON BEAM PLOWS.

No. 9.—The Best of the Wiard Plows.

Landside view of Wiard Forged Steel Beam Plow. All our steel beam flat land plows now have land side and shoe as shown above. Price \$13.50.

The Wiard Swivel Plow with Automatic Jointer or Coulter.

One of the best plows for hillside or flat land and for cutting roots, or use in rough or stony ground. \$13.50.

No. 10-B.—Price \$8 to \$10.

For one-horse, plows 4 to 7 inches deep, 6 to 10 inches wide; weight 77 pounds.

**No. 90 RIGHT HAND
SULKY PLOW.**

This sulky plow is made in the simplest and strongest manner possible, and by the use of levers is guided precisely like a hand plow; and the greatest advantage derived from its use is in plowing lands so hard and stony as to make hand plowing very difficult. Our method of lifting the plow carries the point backward as the plow is raised, freeing it from obstructions under which it may have caught. The patent flanged wheel gives it a perfectly uniform furrow, and enables the operator to "finish a land" with utmost precision.

This is the most desirable Steel Beam Sulky Plow and the best ever turned out by the famous Wiard Plow Co. Fully warranted.

Price, - - \$34.00

M. M. S. POULTRY FENCING.

These patents are owned and controlled by the
DeKalb Fence Co.,
New Haven, Conn.
DeKalb, Ill.
San Francisco, Cal.

Patented July 21, 1896.

[TRADE MARK.]

Patented July 6, 1897.

Every roll Genuine M. M. S. Fencing will
Contain this trade mark in colors.

It is made of the best No. 19 Galvanized Steel Wire, smoothly and evenly woven, and retains its full height before as well as after stretching. Beginning at the bottom, the spacing between the horizontal wires for the first foot is 1 3/4 in., second foot 2 1/4 in., and 3 1/4 in. above. The body wires run horizontally and are parallel to each other, therefore in stretching up the fence, as the tension is on the straight line the fencing CANNOT possibly CONTRACT or BUCKLE between the posts. This feature alone which is of great value, does away with the necessity of using a top or bottom rail, and fully three-fourths of the number of posts required in the old-fashioned poultry netting. In order to give the fence additional strength, a cable composed of two wires twisted together, running lengthwise, is placed every foot in the height of the fence.

Bencottan, Onondaga Valley, and many others who use these diggers.

READ WHAT MR. LITTLEBOY SAYS REGARDING THIS DIGGER.

MR. F. H. EBELING,

Syracuse, N. Y.

Dear Sir ;—I bought a Hallock Potato Digger of you last year and it paid for itself the first season—a wet season at that. This year I dug my own potatoes and earned over \$32.00 by digging for my neighbors. Can use this where the Hoover will not do good work. Have dug potatoes as fast as fifteen men could pick them up. If I could not get another, I would not sell mine for \$100.00.

(Signed) E. LITTLEBOY,

Liverpool, N. Y.

P. S.—I will be glad to verify this to any one who wishes to see me about it.

"NOT IN THE TRUST."

The Adriance, Platt & Co. are not in any trust or combination.

SEND FOR CATALOGUE.

ADRIANCE BUCKEYE MOWERS have been known longer and sold in greater numbers in New York State than other mowers, because they have always embodied the greatest improvements and have combined more good points than any others.

ADRIANCE AND ADRIANCE TRIUMPH REAPERS meet all requirements. The Adriance is the best "all 'round" reaper and great for ensilage corn. The Adriance Triumph is the very highest draft and the leading light reaper.

ADRIANCE ELEVATOR AND ADRIANCE BINDERS suit any farm or conditions. Have the "Straight Away" binding attachment, gear driven reel, device to easily loosen or tighten aprons and other special valuable features. The most economical in use.

WE SELL ALL of the Adriance Line and CARRY EXTRAS in stock.

We give the names of a few who have bought Mowers and Reapers and Binders last season and to whom we refer any who may need machines.

CYPHERS CHICK FOOD

Is a mixture of eleven different grains and seeds, proportioned so as to meet all the needs of growing chicks and to fully nourish them. By the term "fully nourish" we mean a great deal. Chick foods, as a rule contain too much fat-forming and not enough bone-forming elements and in consequence the chick develops indigestion and diarrhoea (which ultimately means no digestion at all), and quickly starves to death, or, if partially nourished, leg-weakness develops and the chick drags out a miserable existence. CYPHERS CHICK FOOD relieves of all concern, as the food is a complete and properly-balanced ration, ready for use.

Price, 50 lbs. sealed bag, \$1.50. 100 lbs. sealed bag, \$2.50

CLOVER MEAL.

Mealed Clover is Shredded Clover, reduced to a meal.

It contains the entire product, stalks, leaves and blossoms. Best form for use in mash food for chicks; the meal being ground sufficiently coarse to give bulk to the mash, thus making it easily digested. 50 lb. \$1.10, 100 lbs. \$2.00.

FORCING FOOD.—Price 50 lbs. \$1.10, 100 lbs. \$2.00.

Where very rapid growth is required a highly concentrated food can be fed, and for this work we recommend CYPHERS FORCING FOOD. No adulteration whatever is permitted in the manufacture of the food.

LAYING FOOD—Price, 50 lbs. \$1.10, 100 lbs. \$2.00.

Is the only successfully-balanced ration from which to make the morning mash. It is made from the best selected grains. The makers of the food manufacture nothing in the way of foods except poultry foods and consequently have no by-products, as in the case with most manufacturers of poultry foods.

MEDICINE CASE OF STANDARD POULTRY REMEDIES.

This assortment of remedies is sufficient to combat all the various diseases of poultry and to check any threatened epidemic. Put up in a neat, strong case of ten remedies. Each lot labeled showing dosage and the diseases which its contents will prevent or cure. Complete directions in plain English on lid of case also on each vial. These remedies are extensively used by experienced poultrymen.

Price, Complete set \$3.00, single vials of 100 tablets, in suitable mailing case, 40c. each.

SEND FOR SPECIAL CIRCULAR FULLY DESCRIBING THESE REMEDIES.

SCRATCHING FOOD—50 lbs. \$1.10, 100 lbs. \$2.00.

In combining grains to be used as an exercise food, scattered in the pens to make the hens work for what they get, it will not do to make up a random assortment of any available material. In this Scratching Food we have exactly filled these requirements. A little of this food scattered in the litter will quickly start the dust flying which means healthy fowls, full of vigor and vitality, and a full egg basket of hatchable eggs.

POULTRY LIBRARY.

Book No. 1, Profitable Poultry Keeping in all its Branches.....	\$.50
“ “ 2, “ Care and management of Poultry,.....	.50
“ “ 3, “ Poultry Houses and Appliances,.....	.50
“ “ 4, “ Egg Farming.....	.50
“ “ 5, “ Market Poultry.....	.50
“ “ 6, Capons for profit,.....	.50

These form a complete and valuable library for poultrymen. They contain no advertising. The special articles alone are well worth the total cost of the entire library. Each is written by an experienced poultryman.

SPECIAL OFFER.—While we consider these books cheap at the price quoted we offer five, ordered at one time, for \$2.00, postpaid, three for \$1.25, postpaid; all six, postpaid, for \$2.50 to one address.

THE CYPHERS NON-MOISTURE INCUBATORS.

Free On Board Cars, Syracuse, N. Y., At Factory Prices.

"By Their Fruits Ye Shall Know Them."

The celebrated CYPHERS NON-MOISTURE INCUBATORS, of which we are authorized agents, are *guaranteed* by the manufacturers as follows :

FIRST:—To require no supplied moisture, thus disposing of the moisture question.

SECOND:—To be self-ventilating the air in the egg chamber remaining sweet and pure.

THIRD:—To be self-regulating, being equipped with the most sensitive, accurate and durable regulator thus far invented.

FOURTH:—To operate with less oil and at less expense than any other make of incubator, and to be as free from offensive odors as an ordinary house lamp.

FIFTH:—To be in all essentials the simplest and easiest to operate and control, requiring less labor and attention than any other incubator.

SIXTH:—To produce larger, stronger and healthier chicks and ducklings than any other style or make of incubator.

SEVENTH:—That where it is run in competition with any incubator of a different make, it shall, in three or more hatches, bring out a larger percentage of the fertile eggs in good healthy chicks and ducklings than does its competitor.

EIGHTH:—That each and every genuine Cyphers Incubator sold under registered trade mark, will do satisfactory work in the hands of the purchaser who will give it a fair trial, or it can be returned to us within 90 days, in good repair, less reasonable wear, and the purchase price will be refunded.

We, as agents for the Cyphers Incubators and Brooders, are authorized by the manufacturers to stand back of the foregoing guaranty in every particular, and *hereby agree to do so*. Under this arrangement all who purchase of us are insured ample protection.

By purchasing Cyphers incubators in large quantities we are able to sell them at exactly factory prices free on board care Syracuse, N. Y., as follows:

No. 3.	360	" "	290	" "	37.00

NEW MODEL COOPS FOR HENS AND CHICKENS.

We offer this season a new and improved model coop, intended for a hen with chickens, but which may be used as a home for the chicks long after they are weaned by the hen, also for a small flock of chickens that are old enough to be taken from the brooder house and colonized out of doors.

This coop is 4 ft. 6 in. wide, 2 ft. deep, 1 ft 9 in. high in front and 1 ft. 3 in. high at the rear. It has two apartments, a closed or house part and a wire inclosed shelter or exercise room. The house part is 1 ft. 9 in. x 2 ft., and is provided with a removable floor. It is separated from the exercise room by a wooden partition with galvanized wire cloth window and door which admit light and air. These coops are attractively painted and if properly cared for will last many years. Price, each \$3.00.

PERFECT MARKER.

This punch is so simple in construction that it will appeal to all as a practical tool. It makes a good, clear cut and does not mutilate the web as do many cheaper punches. These punches are made especially for the work and we guarantee them to meet all requirements. Price, each, 50 cents.

Cyphers Unequaled Apartment Brooders.

This Cut Represents the Style A Outdoor Brooder—Front View.

STYLE A OUTDOOR BROODER—Next to its incubator, the Cyphers Company especially prides itself on the three-apartment, Style A Outdoor Brooder it manufactures. They unhesitatingly guarantee this to be the best brooding device on the market, regardless of price, for either indoor or outdoor use. In this Brooder, with a total floor space of 36x60 inches, we have not only the double brooding arrangement, consisting of the hover and well-lighted apartment surrounding the same, but for daytime use what amounts to a separate cooler brooder, or two brooders in one.

STYLE B INDOOR BROODER—The Cyphers Style B Brooder, standard size, (36x36 inches,) is for indoor use exclusively. It is heated by a Cyphers Safety Brooder Stove, has two apartments for the chicks, one under the hover, the other outside and around the hover; this outside apartment being ten to fifteen degrees cooler than under the hover.

CYPHERS SECTIONAL BROODER.—These Sectional Brooders are made in three sizes, two, three and four sections. They are 38 inches wide and 11 inches high. Each section is three feet long. The materials used are the best. There are six heating pipes, substantial and lasting boilers and lamps, a safety expansion tank, adjustable floors and heavy felt hover curtains. They are the most practical and inexpensive hot water brooders ever designed for indoor use in moderate temperatures.

Like Cyphers Incubators, we sell CYPHERS BROODERS at factory prices, free on board cars at Syracuse, N. Y., as follows :

Style A, Outdoor.....	\$12.00	2-section, sectional.....	18.00
Style B, Indoor.....	10.00	3-section ".....	23.00
		4-section, sectional.....	28.00

If you are further interested in incubators and brooders send 10c for 196-page incubator and brooder catalogue, giving full description of the entire line of manufactures of the Cyphers Company.

COLONY HOUSES.

THE CYPHERS COLONY HOUSES OR ROOSTING COOPS are 3 x 6 feet in size, 36 in. high in front and 24 in. high in back. They are correct in principle and safe against the attacks of the four-footed enemies of poultry. Each coop is well made, has a strong dry floor and is built with a hinge hood that keeps out rain and snow during stormy weather.

Freight on these is so heavy we are unable to quote them f. o. b. Syracuse, N. Y., at the same price the Cyphers Incubator Company quote f. o. b. Buffalo. You will, however, find it to your advantage to purchase them from us at the price we here name.

F. O. B. Syracuse, each.....	\$8.00	F. O. B. Buffalo, each.....	\$7.00

HIGH-GRADE TESTED THERMOMETERS.

The best incubator, or brooder manufactured is useless unless the thermometer used therein is accurate. The operator to be successful, must know the exact temperature in the egg chamber of the incubator and be sure that the chickens in the brooder have the proper amount of heat. The thermometers here listed are manufactured especially for us, and are thoroughly tested before they are shipped.

Incubator Thermometers, each, postpaid..	.60c	Brooder Thermometers, each, postpaid..	.45c
Brooder Thermometers, mounted on wooden holder for use in Cyphers Brooders,		Each, postpaid.....	.55c
